AMINO BOSS®

Calcium

Ca

Highly available plant active chelate formulation

Calcium 62 g/L, Nitrogen 58 g/L

A unique formulation of calcium amino acid chelate solution containing the complete range of amino acids to assist in chelation and plant performance. Recommended for foliar applications where a 100% chelated product with excellent plant uptake and good compatibility is required.

PERSONAL PROTECTION: Avoid skin and eye contact and inhalation of spray mist. Wash hands and face before meals and after work.

STORAGE: Store in original container, tightly closed and in a dry, cool area above 5ºC away from direct sunlight and foodstuffs.

DISPOSAL: Triple rinse empty container and add rinsate to the spray tank. If recycling, discard cap and deliver clean container to an Agrecovery depot. Alternatively crush and bury in an approved landfill. Dispose of product only by using according to the label, or at an approved disposal facility.

SAFETY DATA SHEET: Additional information is listed in the SDS available from the supplier, Sipcam NZ Ltd, and www.sipcam.co.nz

Not classified as a hazardous substance according to the HSNO Act 1996.

FIRST AID:

If swallowed contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor if you feel unwell. If on skin wash with plenty of soap and water. Get medical advice if skin irritation develops. If in eyes rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical advice/attention if eye irritation develops. If inhaled remove person to fresh air and keep at rest in a position comfortable for breathing. Call a POISONS CENTRE or doctor for advice if person feels unwell.

AGRECOVERY Rural Recycling Programme

DIRECTIONS FOR USE

- **AMINO BOSS CALCIUM** is a calcium nutrition deficiency correction for all crops. It can be used in a preventive program or at the onset of symptoms.
- Product should be used during ideal growing conditions to ensure effective uptake.
- Apply by foliar spraying and ensure good leaf coverage and canopy penetration.
- For most effective results apply in the early morning or late afternoon as this will assist in minimising risk of rapid drying on the leaf due to evaporation. Avoid extreme weather conditions such as heat and frost events.
- Utilise foliar, petiole or sap analysis to guide application timings.
- Where local experience of successful use is not available, consider using a small scale test application prior to wide spread use. If any issues are observed DO NOT continue with the application.
- DO NOT apply by foliar application to stone fruit after fruit set unless crop safety has been fully tested on your variety.
- DO NOT apply by foliar application to flowers of any crop unless fully tested.

The following is a general guideline. For detailed recommendations consult your agronomist or crop advisor.

CROPS	GROWTH STAGE	RATE	COMMENTS - ALL CROPS
Cereals ad Seed Crops Vegetables Row Crops	As required for crop and site-specific requirements.	2 - 5 L/ha	Use the high rate and repeat at 7 to 14 day intervals depending on specific crop advice for moderate to severe deficiency.
Lucerne	7 days after cutting.	5 - 10 L/ha	
Pipfruit, Stonefruit, Citrus and Nuts, Kiwifruit, Berryfruit and Grapevines	As required after petal fall according to crop best practice.	2 - 5 L/ha	

COMPATIBILITY

Compatible with most common fertilisers and crop protection products. It is recommended to add to the tank mix after all other products have been mixed well in the tank, including most of the water. Perform a jar test before mixing any potentially incompatible materials.

Exercise caution when mixing with amine-based products.

DO NOT apply **AMINO BOSS CALCIUM** with copper fungicides by foliar application on any crops as it will increase the activity of copper and may result in unacceptable levels of phytotoxicity.
