ECOTOXIC AVOID ENVIRONMENTAL CONTAMINATION
KEEP OUT OF REACH OF CHILDREN
READ LABEL BEFORE USE

SCYLLA[®]

FUNGICIDE

A fungicide for the control of botrytis in grapes and onions, botrytis, anthracnose and rhizopus in strawberries and botrytis and anthracnose in blueberries.

ACTIVE INGREDIENT: 375 g/kg CYPRODINIL and
250 g/kg FLUDIOXONIL in the form of a water dispersible granule.

NET CONTENTS: 5kg

GSSC888/F1

**Grosafe[®]**

HSNO HAZARD CLASSIFICATION:
6.1E, 6.9B, 9.1A, 9.3C

WARNING:

May be harmful if swallowed, inhaled or absorbed through the skin. May cause organ damage from repeated ingestion at high doses.

Very toxic to aquatic organisms. Harmful to terrestrial vertebrates.

ENVIRONMENTAL PROTECTION: Do not apply directly into or onto water. The application of this product is limited to ground-based applications only. Take all reasonable steps to ensure that the substance does not cause any significant adverse effects to the environment beyond the application area.

PERSONAL PROTECTION: When mixing or loading wear overalls, impervious gloves and eye/face protection. Avoid contact with or inhalation of spray mist. Wash hands and exposed skin after work.

STORAGE: Store in original container tightly closed and in a locked, dry, cool, well ventilated area, away from foodstuffs. When stored appropriately this product should show no significant degradation for 2 years from the date of manufacture. Contact the proprietor for further information about the use of this product if it is older than this.

SPILLS AND DISPOSAL: When dealing with spills wear personal protective clothing and equipment as described in the PERSONAL PROTECTION section. Contain spilled product and store in properly labelled, sealed drums for safe disposal. If spray mixture is spilled absorb and collect in drums as above. Deal with all spillages immediately. If contamination of drains, streams, watercourses, etc. is unavoidable, warn the local water authority.

PRODUCT DISPOSAL: If possible dispose of by using according to the label, otherwise dispose of in an approved landfill.

CONTAINER DISPOSAL: Triple rinse container and add residue to mixture. If circumstances, especially wind direction, permit the empty containers may be burned, otherwise bury in a suitable land fill.

APPROVED HANDLER: This product must be under the control of an approved handler during use.

SAFETY DATA SHEET: A safety data sheet is available from Grosafe Chemicals Ltd.

FIRST AID: For advice call a doctor or the National Poisons Centre (0800 764 766). If medical advice is needed, have product container or label at hand. If swallowed, rinse mouth with water but do NOT induce vomiting. Contact POISON CENTRE or doctor if person feels unwell. If in eyes, immediately flush with plenty of water. Remove contact lenses if present and easy to do after 5 minutes, then continue rinsing. If irritation persists, get medical attention. If on skin, remove contaminated clothing immediately. Wash skin with plenty of soap and water. In case of inhalation of spray remove to fresh air and keep at rest in position comfortable for breathing. If person is experiencing respiratory distress then get medical advice.

EMERGENCY RESPONSE: 0800 CHEMCALL (0800 243 622)

GENERAL INFORMATION:

It is an offence to use this product on animals.

Scylla® is a mixture of anilino-pyrimidine and phenylpyrrole fungicides, which in combination have protectant and systemic activity against Botrytis (grey mould) infections in grapes and bulb onions, Botrytis (grey mould), Colletotrichum (anthracnose) and Rhizopus (leak) infections in strawberry, and Botrytis (grey mould) and Colletotrichum (anthracnose) in blueberries. Scylla® has multi-site action, inhibiting spore germination, penetration of the germ tube and mycelial growth. It is rain fast within 2 hours following application.

MIXING

Add the required amount of Scylla® into the mixing chamber of the partly filled spray tank and add the remainder of the water, ensuring complete mixing before spraying. Continue agitation during spraying.

COMPATIBILITY

Scylla® is compatible with other commonly used fungicides and insecticides.

RESISTANCE MANAGEMENT:

GROUP 9 + 12 FUNGICIDE

Scylla® contains a Group 9 fungicide (cyprodinil, belonging to the anilino-pyrimidine class of chemistry) and Group 12 fungicide (fludioxonil, belonging to the phenylpyrrole class of chemistry). Resistance to this fungicide and related anilino-pyrimidine products could develop in some situations from repeated use. To minimise this risk, use the product strictly in accordance with the label instructions.

Blueberries, Grapes and Bulb Onions: Do NOT use more than 2 applications of Scylla® or any other anilino-pyrimidine fungicide on the same crop during the season.

Strawberries: A maximum of 3 applications of Scylla® or any other anilino-pyrimidine fungicide per season can be made if more than six sprays in total are made for Botrytis control. If 6 or less Botrytis control sprays are made then do NOT apply more than 2 applications of Scylla® or any other anilino-pyrimidine fungicide per season.

Consult <http://resistance.nzpps.org/index.php> for alternative modes of action and details of resistance management strategies (if any) for the crops listed on the label.

DIRECTIONS FOR USE:

CROP	DISEASE	RATE	REMARKS
Blueberries	Grey Mould (<i>Botrytis</i>), Anthracnose (<i>Colletotrichum</i>)	80g/100 litres of water, applying sufficient mixture to ensure 800g product/ha	A maximum of 2 applications of Scylla® can be made per season. Apply in sufficient water to ensure thorough and uniform coverage without runoff (Approx. 1000L/ha). The first application should be made at full flower, with the second application no later than 14 days after the completion of flowering.
Grapes	<i>Botrytis</i>	80g/100 litres of water, applying sufficient mixture to ensure 800g product/ha	The rate suggested is for high volume spraying to runoff. For concentrate spraying, adjust dilution rate accordingly. It is essential that good coverage of the bunch zone is achieved. The addition of non-ionic wetting agent at label rates will assist coverage. A maximum of 2 applications per season can be made. Scylla® can be applied at either early flowering (5% capfall), late flowering (80% capfall), pre bunch closure or in the period from the beginning of berry ripening up until 28 days before harvest. Apply an approved fungicide from a different chemical group for the remainder of the season.
Bulb Onions	<i>Botrytis</i>	800g/ha	A maximum of 2 applications of Scylla® can be made per season at key timings for Botrytis control. Apply in sufficient water to ensure thorough and uniform coverage. Applications MUST be made with the addition of non-ionic wetting agent at label rates.
Strawberries	Grey Mould (<i>Botrytis</i>), Anthracnose (<i>Colletotrichum</i>) and leak (<i>Rhizopus</i>)	80g/100 litres of water, applying sufficient mixture to ensure 800g product/ha	The rate suggested is for high volume spraying to runoff. For concentrate spraying, adjust dilution rate accordingly. It is essential that good coverage is achieved. The addition of non-ionic wetting agent at label rates will assist coverage. Scylla® can be applied at 7 to 14 day intervals from flowering onwards. The closer interval is recommended when conditions are conducive to disease infection. Scylla® applications may be applied in a block or in alternation with other non anilino-pyrimidine fungicides registered for botrytis control. See resistance management for the maximum number of applications.

WITHOLDING PERIODS:

It is an offence for users of this product to cause residues exceeding the relevant MRL in the New Zealand (Maximum Residue Limits of Agricultural Compounds) Food Standards.

Blueberries	Last application no later than 14 days after flowering and at least 28 days before harvest
Strawberries	3 days
Bulb onions	7 days
Grapes	28 days

Registered pursuant to the ACVM Act 1997, No P9577

See www.foodsafety.govt.nz for registration conditions.

Approved pursuant to HSNO Act 1996, Approval Code: HSR100937

See www.epa.govt.nz for approval conditions

WARRANTY: This formulation is warranted to contain the specified active ingredient within accepted analytical tolerance when packed. The user bears the risk for damage resulting from factors beyond the manufacturer's control. The manufacturer declines all liability for damage resulting from improper storage or use of the product.
