litres**

# ACTIVATED AMITROLE

PEEL HERE

**ACTIVE INGREDIENT:** Contains 400g/litre amitrole in the form of a soluble concentrate.

**Grosafe® Activated Amitrole** is a non selective herbicide for the control of hard to kill weeds including bamboo, wandering jew and couch.

**IMPORTANT: PLEASE READ THIS LABEL COMPLETELY BEFORE USE**

**WARNING: KEEP OUT OF REACH OF CHILDREN.**

Eye irritant, may cause reproductive/development damage from ingestion. May cause organ damage from repeated ingestion.

**PRECAUTIONS:** In the event of spillage, prevent the liquid from entering waterways.

Absorb spill with soil. Avoid contact with skin, eyes and inhalation of spray mist. Wash hands and exposed skin after use and before eating. Dispose of empty containers safely. Avoid contamination of water supply with chemical or empty container.

**FIRST AID:** If contact with skin occurs wash thoroughly with soap and running water, if contact with eyes flush immediately for several minutes with water. If swallowed, DO NOT induce vomiting, give a glass of water and call a doctor or the National Poisons Centre on 0800 764 766

**GENERAL INFORMATION: Grosafe® Activated Amitrole** is a non-selective weed killer that is best applied to actively growing weeds. It has an activating additive that helps its absorption and translocation through the weeds to inhibit chlorophyll formation and the development of new growth.

**CAUTION:** Apply carefully during still weather as spray drift may cause serious damage to desirable plants. Avoid excessive spray run-off onto the soil. Do not sow treated areas for 5–6 weeks.

**LIABILITY:** This product must be used strictly as directed. **Grosafe® Chemicals Ltd** will not be liable for any loss or damage arising from a failure to strictly follow the directions for use.

**DIRECTIONS:** Mix **10ml per litre** of water for the control of annual broadleaf weeds and easy-to-kill grass weeds. Mix **20ml per litre** of water for the control of bamboo, cape ivy, couch, docks, mercer grass, periwinkle, sorrel, wandering jew, wild onion and woolly nightshade. Apply evenly as a light spray covering as much of the weeds foliage as possible. Depending on weather conditions results may take 3–4 weeks to appear. To control bamboo, cut hard back to just above ground level and spray regrowth when approximately 1 metre high. Some hard-to-kill weeds may regrow and require repeat spraying.

**COMPATIBILITY:** Recommended to be used in conjunction with **Grosafe® Force Penetrant**.

**Grosafe® Activated Amitrole** is slightly corrosive and should not be left in sprayer once mixed. Wash out spray equipment thoroughly as soon as possible after use.

**HSNO CLASSIFICATIONS: 6.1E, 6.4A, 6.8B, 6.9A, 9.1B, 9.2A**

Approved pursuant to HSNO Act 1996.
