

Introducing the new Organic FreeFlo™ Copper Fruit & Vegies from Grosafe

Grosafe is a locally owned business established in 1995 and operating out of its Mt Maunganui warehouse. Grosafe supplies products to the key horticultural sectors including kiwifruit, pipfruit, stonefruit and viticulture.

In 2012 Grosafe started to supply the home garden market with their commercial grade formulations in smaller pack sizes. FreeFlo™ Copper Fruit & Vegies is their latest new registration.

FreeFlo™ Copper Fruit and Vegies active is Copper Hydroxide 300g/kg. This type of copper has a smaller particle size than copper oxychloride which will help give better coverage on the plant surface and give the plant very good fungicidal protection.

Benefits of FreeFlo™ Copper Fruit & Vegies' small particle size:

- Copper Hydroxide has up to 18 times more bioavailable copper for disease control than Copper Oxychloride*
- Better coverage, rainfastness and longevity*
- Increased dispersion and suspension properties*
- Easy to measure and handle
- Excellent crop safety

FreeFlo™ Copper Fruit & Vegies offers:

- Reduced elemental copper application equals better environmental protection
- Quality formulation resulting in problem free handling, mixing and application
- Certified for organic gardens
- One day withholding period

* Supporting data available from Grosafe

Introducing EcoSpread® Super Spreader

Grosafe is also introducing EcoSpread Super Spreader to its extensive range of products.

EcoSpread® is the only BioGro® Certified super spreader surfactant that enhances spreading when used with herbicides, insecticides, fungicides, growth regulators and foliar fertilisers. As a super spreader, the sprayed droplets are distributed widely and rapidly resulting in an evenly wetted plant. EcoSpread® improves rainfastness down to 30 minutes.

EcoSpread® improves active ingredient uptake by increasing the penetration through the waxy layer of leaves, even under difficult conditions.
