Organic EnSpray 99® INSECT OIL READY-TO-USE

INSECTICIDE & FUNGICIDE

4547

A ready-to-use spray oil
for the control of mites, aphids,
thrips, scale, mealy bugs, whitefly,
powdery mildew and botrytis.

Designed for biocidal use. Read label before use.

300ml
READY-TO-USE SPRAY

Organic Enspray 99® Insect Oil is a ready-to-use insect spraying oil for the control of mites, aphids, thrips, scale, mealy bugs, whitefly, powdery mildew and botrytis in all ornamentals and roses.

Not to be used on plants to be consumed as food.

DIRECTIONS:

Commence spraying at first sign of insects or disease. Repeat at 14 day intervals if required. Do not spray in the heat of the day or when the soil is dry and plants are under moisture stress.

1. Shake bottle well before use and maintain periodic agitation during use.
2. For **initial use**, pump spray trigger approximately 5 times to pressurise bottle. Mist will disperse when enough pressure is achieved.
3. Pump as desired for required spray volume and ensure complete coverage on all leaf surfaces including undersides of vegetation.
4. For a 2-3 second continuous spray, quickly pump the trigger to increase pressure in bottle. This allows you to hold the base of the bottle and turn it to easily spray the underside of the leaves.

NB: Always hold bottle upright when pumping trigger to avoid drawing air.

GENERAL INFORMATION:

Apply only as spot treatment. It is preferable to spray when drying conditions are good, although avoid the midday sun. Do not use within 14 days of any sulphur sprays. Bottle can be reused, however please refrain from using powder/granular formulations as the particles may block the nozzle. Can use on indoor plants for insect control and to enhance leaf shine.
