

Grosafe®

Organic EnSpray 99®

INSECT OIL

READY-TO-USE

INSECTICIDE & FUNGICIDE

A ready-to-use spray oil for the control of mites, aphids, thrips, scale, mealybugs, whitefly, powdery mildew and botrytis.

Organic EnSpray 99® Insect Oil is a ready to use insect spraying oil for use on all ornamentals and roses. **Not to be used on plants to be consumed as food.**

Can use on indoor plants for insect control and to enhance leaf shine.

DIRECTIONS:

Commence spraying at first sign of insects or disease. Repeat at 14 day intervals if required. Do not spray in the heat of the day or when the soil is dry and the plants are under moisture stress.

It is preferable to spray when drying conditions are good, avoid the midday sun.

Bottle can be reused, however do not use powder/granular formulations as the particles may block the nozzle.

Shake the bottle well before use and maintain periodic agitation during use.

For initial use, pump the spray trigger approximately 5 times to pressurise the bottle and load spray chamber. Mist will disperse when enough pressure is achieved.

Pump as desired for required spray volume and ensure complete coverage on all leaf surfaces including undersides of vegetation.

for a 2-3 second continuous spray, quickly pump the trigger to increase pressure in the bottle. This allows you to hold the base of the bottle and turn it to easily spray the undersides of leaves.

NB: Always hold the bottle upright to avoid drawing air.
