

# IT'S COPPER TIME

With Grosafe FreeFlo® Copper for Roses and Ornamentals and FreeFlo® Copper Fruit & Vegies, registered for use on food crops

Grosafe FreeFlo® coppers contain copper hydroxide 300g/kg which is ideal for winter clean-up and should be used on your roses, citrus and fruit trees. By using a FreeFlo® Copper, this will help eliminate undesirable fungal and bacterial diseases after you have pruned.

Grosafe's copper hydroxide 300g/kg formulation has a smaller particle size than other coppers, which helps to give you better coverage on plant surfaces and eliminates undesirable fungal spores. It is ideal to use as your winter clean-up spray.
