

SCIENCE OF THE SEA - SMARTER SEaweEDS

Many gardeners know the benefits of seaweed, but less well-known is that not all seaweeds are equal. In terms of nutrient density and plant yield, the most effective seaweed species is *Ascophyllum nodosum* from the North Atlantic. This is the species of seaweed used in Grosafe's range.

OceanFert® Seaweed Fertiliser

- Only slow-release seaweed fertiliser on the market
- BioGro Certified
- Great alternative to sheep pellets or blood and bone
- High in organic matter, improves soil structure
- One application feeds plants for 4-6 months
- Can be applied directly to soil without fear of burning the roots of seedlings
- Natural stimulant

BioPower® Seaweed Flake

- Water dispersible seaweed flake concentrate
- BioGro Certified
- Supports crop health, nutrition and quality
- Easily applied, mixed with water and sprayed directly onto the foliage

Ocean Power® Super Seaweed Plant Food

- Concentrate Liquid seaweed with natural stimulants
- Improves crop, plant and soil health
- Boosts plant vigour
- Defends against natural climatic occurrences (drought and frost)
- Protects against insect attack
