ORGANIC EnSpray 99®

INSECT OIL

INSECTICIDE & FUNGICIDE

A ready-to-use spray oil for
the control of mites, aphids,
thrips, scale, mealy bugs,
whitefly, powdery mildew
and botrytis.

treats
9m²

300ml

GENERAL INFORMATION:
Organic Enspray 99 Insect Oil is a ready-to-use insect spraying oil for the control of mites, aphids, thrips, scale, mealy bugs, whitefly, powdery mildew and botrytis in all ornamentals and roses. **Not to be used on plants to be consumed as food.**

Apply only as spot treatment. It is preferable to spray when drying conditions are good, although avoid the midday sun. Do not use within 14 days of any sulphur sprays. Bottle can be reused, however please refrain from using powder/ granular formulations as the particles may block nozzle. Can use on indoor plants for insect control and to enhance leaf shine.

DIRECTIONS FOR USE :

Commence spraying at first sign of insects or disease. Repeat at 14 day intervals if required. Do not spray in the heat of the day or when the soil is dry and plants are under moisture stress.

1. Shake bottle well before use and maintain periodic agitation during use.
2. For **initial use**, pump spray trigger approximately 5 times to pressurise bottle. Mist will disperse when enough pressure is achieved.
3. Pump as desired for required spray volume and ensure complete coverage on all leaf surfaces including undersides of vegetation.
4. For a 2-3 second continuous spray, quickly pump the trigger to increase pressure in bottle. This allows you to hold the base of the bottle and turn it to easily spray the underside of the leaves. NB: Always hold bottle upright when pumping trigger to avoid drawing air.

CONTROLS

Aphids

Botrytis

Mealy bugs

Mites

Powdery
Mildew

Scale

Thrips

Whitefly
