## PLANT ACTIVE CHELATE FORMULATION

B

**WARNING:** This product should not be swallowed or inhaled. May cause mild skin and eye irritation. Avoid contact with skin or eyes.

**PERSONAL PROTECTION:** Avoid skin and eye contact and inhalation of spray mist. When mixing or applying wear waterproof gloves, eye protection, boots and overalls. DO NOT eat, drink or smoke while using. Wash splashes of concentrate from skin immediately. Remove protective clothing and wash hands and face thoroughly before meals and after work. Wash protective clothing daily after work.

**STORAGE:** Protect from frost, store above 5°C. Store in original container, tightly closed and in a dry, cool area away from direct sunlight and foodstuffs.

**DISPOSAL:** Triple rinse empty container and add rinsate to the spray tank. If recycling, remove cap and deliver clean container to an Agrecovery depot. Alternatively crush and bury in a suitable landfill. Dispose of product only by using according to the label, or at an approved disposal facility.

**SAFETY DATA SHEET:** Additional information is listed in the SDS available from the supplier, Sipcam NZ Ltd, and [www.sipcam.co.nz](http://www.sipcam.co.nz)

Not classified according to the HSNO Act 1996.

### FIRST AID:

If swallowed DO NOT induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. If splashed in eyes, wash out immediately with water.

**EMERGENCY RESPONSE 0800 CHEMICAL:**  
0800 243 622

### Highly available plant active boron formulation Total boron (B) content of 5% W/V as Amino Acid Chelate

A unique formulation of boron amino acid chelate solution containing the complete range of amino acids to assist in chelation and plant performance. Recommended for foliar applications where a 100% chelated product with excellent plant uptake and good compatibility is required.

### THE PRODUCT

- **Amino Boss Boron** is a boron nutrition deficiency correction for all crops. It can be used in a preventive program or at the onset of symptoms.

### DIRECTIONS FOR USE

- Product should be used during ideal growing conditions to ensure effective uptake. Avoid extreme weather conditions such as heat and frost events. For most effective results apply in the early morning or late afternoon as this will assist in minimising risk of rapid drying on the leaf due to evaporation. Where local experience of successful use is not available, use a small scale test application prior to wide spread use. If any issues are observed do not continue with the application.
- It is recommended to add to the tank mix after all other products have been mixed well in the tank, including most of the water.
- Do not apply by foliar application to stone fruit.
- Do not apply by foliar application to flowers of any crop.

CROPS	GROWTH STAGE	RATE	COMMENTS
<b>Cereals</b> (wheat, barley, oats, triticale)	From 3- 5 leaf to GS30	0.5 - 2 L/ha	Apply by foliar or fertigation.  Use the high rate and repeat at 14 day intervals for moderate to severe deficiency.
<b>Grain and Silage maize</b>	6 - 8 leaf		Can be injected at planting.
<b>Seed and Forage Legumes</b> (clover, peas, Lucerne)	10 - 14 days before flowering. For grazing/ forage Lucerne 7 - 10 days after cutting.		
<b>Seed and Forage Brassicas</b> (swede, turnip, kale, rape, and hybrids) <b>Seed, Fodder and Sugar Beet</b>	From 4 - 9 leaves		
<b>Vegetables</b> (brassicas, cucurbits, fruiting vegetables, potatoes, carrots, onions)	From onset of active growth.		
<b>Tree and Nut Crops</b> (excluding stonefruit) <b>Berries and Vines</b>	Pre flower and as required according to individual crop best practice.	Foliar: 0.5 - 1 L/ha Fertigation: 1 - 2 L/ha	Apply at regular 7 - 14 day intervals in sufficient water for complete coverage.

### COMPATIBILITY

Compatible with most common fertilisers and crop protection products. It is recommended to perform a jar test before mixing. Do not use with emulsifiable concentrate (EC) or amine based products. Do not apply **Amino Boss Boron** with copper fungicides by foliar application on any crops as it will increase the activity of copper and may result in unacceptable levels of phytotoxicity.

**NOTICE TO BUYER:** This product must be used in accordance with the directions for use. Other than warranted by New Zealand consumer protection law, Sipcam's liability for any direct, indirect or consequential loss which you incur, including, without limitation, loss or damage to crop, loss of equipment, property damage, personal injury or death is limited, at Sipcam's option, to the replacement of the product or the supply of an equivalent product. By opening this package, you agree to be bound by these terms. If you do not agree to these terms, please return the entire unopened package intact to Sipcam or the place in which you purchased this product for a full refund.
